Now, choose the heat and moisture exchange system right for your breathing needs and activity levels

Introducing the new Blom-Singer® EasyFlow™ HME

Blom-Singer® ClassicFlow™ HME

INHEALTH® TECHNOLOGIES
We speak ENT
Choosing the right HME is easy: Blom-Singer® HMEs

Take your pick: the Blom-Singer ClassicFlow or the new Blom-Singer EasyFlow. Both help ensure that you breathe humidified, filtered, and warmed air. Research shows that long-term HME use results in:

- **Less mucus**¹
- **Less coughing**¹
- **Less risk of shortness of breath, fatigue, sleep problems, anxiety, and depression**¹²

The new Blom-Singer® EasyFlow™ HME

*Breathe easier at work or play*

With EasyFlow, you can breathe a little easier. Its foam filter is more porous than the ClassicFlow. This allows you to breathe more freely to match your activity level and pulmonary needs.

Plus, EasyFlow’s beige tint and non-reflective surface texture is less noticeable.
The Blom-Singer® ClassicFlow™ HME

Breathe healthy day and night

ClassicFlow helps assure you breathe warmed, filtered, and humidified air—all day, every day—to reduce respiratory symptoms after a total laryngectomy. ClassicFlow is designed for increased moisture retention and resistance.

Both share unique advantages

MucusShield™ helps protect the foam filter

With other HMEs, if mucus gets on the filter, the efficiency of the filter is reduced. Not so with Blom-Singer HMEs. The MucusShield technology guards the foam filter from direct contact with mucus to help enhance efficiency.

EasyTouch™ speech button makes speaking easier

When you want to talk, press the EasyTouch speech button to seal the valve and speak easily. Upon release, the EasyTouch returns to its open, breathing position.

24/7 heat and moisture exchange

Our HMEs are “daily-disposable,” 24-hour-use devices. You simply put on a new one each day, and the benefits continue through the night.

Also available

Blom-Singer® HumidiFilter™ System

HumidiFilter is the simple, cost-effective alternative for heat and moisture exchange. Simply place a new filter once a day into the holder to get the benefits of wearing an HME. The holder is reusable and designed for daytime use.
For everyday or more active use, the choice is easy: Blom-Singer® HMEs

For more information or to order the new Blom-Singer® EasyFlow™ HME, Blom-Singer® ClassicFlow™ HME, or Blom-Singer® HumidiFilter™ System, contact InHealth Technologies.
